## HIGH PRESSURE HYDRO BLASTING KDD SERIES

PAINT REMOVAL

CLEANING

SURFACE PREPARATION

SHIP HULL CLEANING

# HYDRO BLASTING APPLICATIONS

Paint removal

Concrete surface Vessel cleaning

Marine surface preparation

Chloride removal from concrete

Concrete surface Vessel cleaning

Kiln Cleaning

# KDD SERIES – KDD 20, KDD 24

- ✓ Field proven design.
- ✓ Forged S.S. pump head construction with high strength.
- ✓ KB Series designed with in-built gear.
- ✓ Splash lubrication. Force feed lubrication also available on request.
- ✓ Available in 3 versions.
- ✓ Rigorously subjected to full load testing.
- ✓ Manufactured on state-of-the-art machinery.
- ✓ Available direct couple 1750 RPM drives.
- ✓ Easy Field Maintenance.

Pump model	Flow (LPM)	Flow (GPM)	Pressure (Bar)	Pressure (PSI)	Motor H.P.	Engine H.P.
KDD 20	30	7.93	1400	20000	120	154
			1250	18130	100	125
			950	13780	75	94
KDD 22	37	9.78	1000	14500	100	125

**Note: - All pumps are suitable for 50 Hz and 60 Hz. Gear ratio will change as per Hz.**

We manufacture wide range of hydro jetting machines for the pressure ranging from **250 bar to 1400 bar**.

Technical Details: -

Inlet connection (BSPF) – 2"

Outlet Connection (BSPF) – 1/2"

Working Fluid Temp. – 60 °C

**Trolley Mounted Diesel  
Driven System**

**Base Frame Mounted  
System**

# HYDRO JETTING ACCESSORIES

## SAFETY VALVE

**Safety valve** is a very important accessory. It **prevents major accidents** from occurring in case of problem arising out of high pressure built up in line. It is standard on all PressureJet Pumps for temporary relief of excess system pressure.

### Safety Valve

- ✓ Provides over-pressure protection
- ✓ Ensures safety for operator
- ✓ Intentionally designed weak part to avoid major loss
- ✓ Pressure range up to **1400 bar - 20,000 PSI.**
- ✓ Flow rate range up to **80 LPM – 21.13 GPM.**

## PRESSURE REGULATING VALVE

A **pressure regulating valve** is a control valve that regulates the output pressure of the pump. Regulators are used for gases and liquids, and can be an integral device with an output pressure setting, a restrictor and a sensor. These may all be in the one body, or consist of a separate pressure sensor, controller and flow valve.

### Pressure Regulating Valve

- ✓ Regulates output pressure as required
- ✓ Bypasses excess water
- ✓ Pressure range up to **1400 bar - 20,000 PSI.**
- ✓ Flow rate range up to **80 LPM – 21.13 GPM.**

# HIGH PRESSURE CLEANING NOZZLE-ROTATING

**High Pressure Cleaning Nozzle (Rotating)** are the industry standard for speed controlled rotary shot-gunning. Being so versatile and easy to maintain, Barracuda tools are also used on automated and hands-free equipment

## High Pressure Cleaning Nozzle-Rotating (BARRACUDA)

- ✓ Highly effective and time saving than conventional
- ✓ International Standard
- ✓ With self-rotary tools, jet reaction creates rotation so there's no need for compressed air

# LOW PRESSURE SUCTION & BYPASS HOSE

**Low Pressure Suction & Bypass Hose** use to connect water tank to pump inlet line. And also connect bypass water from PRV

## Low Pressure Suction & Bypass Hose

- ✓ Suction hose to connect water tank to pump inlet line and bypass water from PRV
- ✓ Flexible type Rubber hose
- ✓ Available in various lengths as per requirement.

# HIGH PRESSURE RIGID LANCE

In hydro jetting applications, a **high pressure rigid lance** provides easy and firm grip to counter back pressure at the time of in and out movement of nozzle. A nozzle is attached to the end of the lance and the size of the nozzle provides certain pressure depending on the flow rate.

## High Pressure Rigid Lance

- ✓ SS construction for long life.
- ✓ Available in various lengths as per requirement.

# CONTROL PANEL

A **control panel** is a flat, often vertical area where control or monitoring instruments are displayed. It has many controls like on/off button, Safety Shut-down switch, Voltage and Ampere readings etc....

## Electric Control Panel

- ✓ For over and under voltage protection
- ✓ Electric control panel has important and necessary controls like hour meter, volt meter, over load protection, etc.
- ✓ Control panel comes with single phase and short circuit protection

Electric Control Panel

# PRESSURE GAUGE

**Glycerin Filled Pressure Gauge**, ideal for dampening the effect of pulsation and vibration. Widely demanded, it has a stainless steel case filled with glycerin to offer protection against harsh environments. It enhances the integrity and reliability of measuring system for long periods under extreme operating condition.

Note: - Available in various size as per requirement.

## Pressure Gauge

- ✓ Approx. 2 times pump operating pressure
- ✓ Glycerin filled
- ✓ Easy to read dial
- ✓ With needle valve

# SAFETY SUIT

**Safety Suit** design with Rugged and Lightweight , Water jet operators appreciate the comfortable and easy-to-replace, hinged-panel design of lightweight TurtleSkin WaterArmor. The modular design allows any of the 19 individual components to be easily removed and replaced using common tools. The replacement of one or two individual parts is far less costly than the expense of purchasing a whole new suit.

## Safety Suit

- ✓ For Protection of operator from high pressure water
- ✓ Essential for safety

# TRIGGER OPERATED DUMP GUN

**Trigger Operated Dump Gun** in high pressure water blasting design with Rugged and Lightweight , Water jet operators appreciate the comfortable and easy-to-replace, hinged-panel design of lightweight TurtleSkin WaterArmor. The modular design allows any of the 19 individual components to be easily removed and replaced using common tools. The replacement of one or two individual parts is far less costly than the expense of purchasing a whole new suit.

## Trigger Operated Dump Gun

- ✓ For Protection of operator from high pressure water
- ✓ Essential for safety
